1. [redacted] in one of the enterprises under the jurisdiction of the Main Administration for Industrial Requirements, it is planned that MIG-15 and MIG-17 planes ~~are to~~ be built in East Germany. Production of MIG-15 planes is expected to be in full swing by the summer of 1956. Technical personnel in the Pirna-Sonnenstein compound of the Main Administration are engaged in converting the MIG-15 documentation, which was furnished by the USSR, into German documentation so that the plane can be constructed according to ISO and ISA norms (or standards) rather than the Soviet GOST norms. Acceptance of the GOST norms proved to be impractical since most of the East German machine tools are constructed according to international standards.

2. Construction of the MIG-17 plane is expected to start after the summer of 1956.
